Tap on SD card icon then choose SD card storage to acess your recordings on SD card

On recording list, tap on right icon to download file, once file is downloaded you can play it

# III TM HR 18:35 39% Recording settings Save

#### Recording mode

Continuous record mode When the device is connected to the network, the user can check the live audio at any time, and the device can record continuously all the time (also

#### Power saving mode A - Standby current

.6mA/h When the device is connected to the network, the ser can check the live audio at any time, and the levice can push the audio alarm and record audio

Power saving mode B - Standby current 1mA/h When the device is connected to the network, the

within 1 minute of each sound-activated, and the device can push the audio alarm and record audio when sound-activated.

Trigger Sensitivity: 128

High Medium Low

#### **RECORDING SETTINGS PAGE:**

**Continuos record mode:** In this mode device will allways be connected on WiFi network and will allways record. In this mode battery consumption is maximum

**Power saving mode A** : This is standby mode, when sound is present device recording, WiFi is on standby (not connected but ready to connect on your request for live listening), you can connect to device anytime for live listen or recording download. Battery consumption is moderate. This settings is RECOMENDED

**Power saving mode B:** This is deep sleep mode with lowest battery consumption, WiFi is OFF, live listening is not possible if there is no sound present. Voice activation works and device is Wifi accesible for live listen and setup changes only during recording interval. Be careful with this mode, especially if triger sensitivity is on Low, possible that device will be allways OFF.
