3. Operation

Bluetooth Speaker(w/o DVR function)

- Switch ⑭ to "BT" and long press ② to turn on the power. You will hear "Power On" from the device.
- When the device is turned on, the blinking Blue LED shows that the speaker is ready to pair with mobile device. Go to your mobile device and turn on the Bluetooth. You will find the name "PV-BT10" on your mobile device and you can pair your mobile device to the speaker.
- Once the device is connected to the speaker, the Bluetooth status indicator on the speaker changes from blinking blue to solid blue LED and you will hear "Connected".
- Understanding the control button
 - 1.V- : Decreases speaker volume. Press and hold to continuously decrease the volume
 - 2.V+ : Increases speaker volume. Press and hold to continuously increase the volume

2

DVR

- Switch ⑭ to the right "V" and long press ②. After 40 seconds of system initialization, the DVR will be on.
- When the DVR is turned on, the blinking orange LED shows that the DVR is ready for IP connection. For more WiFi/IP connection instruction, please refer to PV Cam Viewer Quick Guide for more details.
- To disable the DVR LED indicator, please switch ⑫ to "OFF".

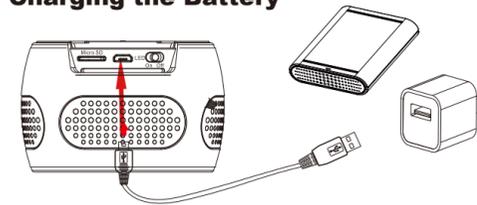

*If the speaker is not connected to any device, it will power off after 3 minutes of idle time.

4. LED Indicator

- Blinking blue LED ■ - Bluetooth ready to pair with mobile device
- Solid blue LED ■ - power on
- Solid red LED ■ - recording on
- Blinking orange LED ■ - searching for Wi-Fi connection
- Solid orange LED ■ - device connected to phone (P2P connected)
- Solid green LED ■ - device connected to the router (IP connected)

3

5. Charging the Battery

Connect the micro USB end of the cable to ⑪ and connect the other end to a USB power source, or plug it to a power bank of your own choice. The power bank then works as an extra battery. When charging is complete, the three blue LEDs will all be on.

6. Format Memory Card

Go to the Program Setting on the PV Cam Viewer App to format the memory card.

7. Date and Time Setting

Go to the Program Setting on the PV Cam Viewer App to change the date and time setting.

8. Recording Mode

Go to Recorder Setting on the PV Cam Viewer App to change the recording mode to continuous recording or motion detection recording.

4

9. Download videos to PC

With memory card inserted in the device, connect it to PC with USB cable. Power on the device and the removable disk of the memory card will appear on your PC for you to view and download video files.

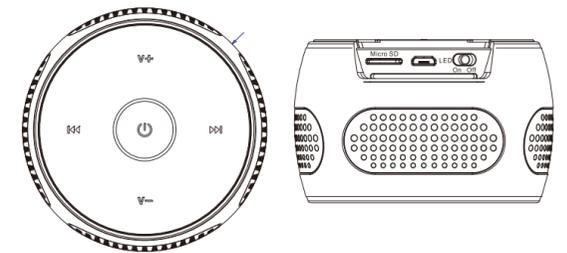

10. Specification

Built-in image sensor	1/2.9" progressive CMOS sensor
Sensor resolution	2000x1121
Sensor sensitivity	0.1 Lux @ F 2.0
Lens F/No.	F 2.0
Focal Length	3.64
Angle of View	78°
Video Spec.	
Algorithm	H.264, JPEG
File Format	MOV, JPG
Video recording mode	Auto/Manual/Motion Detection
Recording Capability	1920x1080, 1280x720, 848x480
Frame rate	Up to 30 fps
Photo Capability	2M(1600*1200)
WIFI	
WIFI	Built-in WIFI Module
Storage & I/O	
Memory type	Micro SD Card (Support SDHC max. 32GB)
Data interface	Card Reader
Misc.	
Date/Time Table	YYYY/MM/DD, HH:MM:SS
Snapshot	recording and playback video
Power	
Power Input	DC 5V
Power Consumption	480mA-530mA(WiFi ON) , BT+(20-380mA)
Battery Input	DC 3.7V / 1400 mA polymers battery(XK504355)
Charging Time	180min(500mA)
Battery Lifetime	150min(1080P)BT OFF
	165min(720P)BT OFF
	180min(WVGA)BT OFF
Recording time	500min @ 1920x1080 resolution (16GB SD card)
Physical	
Dimension	86X86X54(mm)
Weight	345G
