

S3-KIT

KIT COMPLETE FOR TSCM

Complete kit for TSCM (Technical Surveillance Counter Measures) activities: visual inspection, RF/electronic diagnostics, evidence protection, restoration interventions, and field safety. Military-grade shockproof case with trolley included.

Visual acquisition tools:

- Articulating videoscope: Ø6 mm probe, 4-way, 6-LED illumination, joystick control — inspections in confined spaces.
- Multimeter tester + line cable detector, POE, NCV, AC/DC, LCD testing, cable tracing.
- Wireless thermal imaging camera: Bluetooth connectivity for iOS/Android smartphones — quick thermal connection.
- 15W UV flashlight (365 nm): forensic inspections and trace detection.
- G40pro 2000 lm rechargeable flashlight: high-power LED, USB-C charging.
- Walabot DIY 2 wall scanner: wall scanner for Android/iOS smartphones — structure and cable location.
- Portable laser rangefinder with video camera: color display, voice transmission, 100/150/200 m range (models/configurations).
- Carson Mini Aura NV-200 night vision device: low-light vision.

Hand tools:

- Pliers set, Allen wrenches, socket set, screwdrivers.
- Gunsmith's hammer
- Cutter, wire stripper, snips/micro-cutters.
- RJ45 crimping tool with connectors.

Evidence protection:

- Faraday bag: isolates RF devices.
- Evidence bags and tamper-evident security seals.

Site preparation and restoration

- Professional mini vacuum cleaner.
- Small hole repair kit, furniture wipes, touch-up kit.
- Disposable shoe covers.
- Technical tapes and epoxy resins for fixing/touch-ups.
- Certified safety glasses.

Safety:

- First aid kit
- Safety glasses
